D3 TECHNOLOGIES Earns Simulation Specialization from Autodesk, Inc.

Springfield, MO – D3 TECHNOLOGIES, lean engineering and Digital Prototyping experts in the manufacturing industry, announced today that it has earned the new Simulation Specialization designation from Autodesk for Value Added Resellers (VARs). Autodesk Simulation products, part of the Autodesk solution for Digital Prototyping, provide the tools necessary to predict, optimize, and validate the integrity of 3D designs before they are manufactured. By taking on this new Simulation Specialization from Autodesk, the team at D3 is proudly stating their capability to provide the highest level of knowledge, training, and support to their customers in the area of simulation.

The Simulation Specialization designation given by Autodesk establishes D3 Technologies as a proven simulation partner and trusted advisor. In addition to receiving this specialization, D3 recently brought Bill Baker onto the team, a Professional Engineer and Simulation Specialist with over 30 years of experience in the industry. With Bill on the team, D3 is confident that they are more than equipped to deliver their services and solutions to its customers.

“It’s an honor to have one of the world leaders in 3D design, engineering, and entertainment software acknowledge our expertise in simulation software,” states D3’s president, Kevin Schlack. “Our objective has always been to increase revenue and reduce costs for our customers, and the Autodesk Simulation products are an important part of that process,”

About D3

Founded in 1998, D3 Technologies is a consulting company that partners with manufacturers to help them leverage the latest in engineering technologies in order to design their products better and bring them to market faster. With multiple offices and training centers located all across the Midwest, D3 is a true partner that delivers solutions to help all manufacturing companies pursue continuous improvement goals to increase productivity and profitability. As one of the largest and most accomplished Autodesk Manufacturing Partners in North America, D3 focuses on 3D design, product data management/product lifecycle management (PDM/PLM), engineer-to-order (ETO), and configure-to-order (CTO) solutions. For more information on D3, please visit www.d3tech.net.
