D3 TECHNOLOGIES Authorized in Autodesk Plant Solutions

Springfield, Missouri - July 7, 2008 - D3 Technologies, the leader in delivering Autodesk manufacturing and plant solutions, is proud to announce that they are now one of four authorized resellers for Autodesk Plant Solutions. This authorization includes the lower 48 states as a territory. [Click here for more information on Autodesk Plant Solutions](#)

Along with this initiative, D3 would like to announce that it has added a talented new team member, Greg Silva. Greg has joined D3 as a Plant Solutions Specialist. He will be heading up the D3 Plant Solutions Division while working closely with the 6 existing members of the D3 team already trained to sell, support and train for the Autodesk Plant products.

Greg is highly skilled in the process piping field, with over 24 years experience in the industry and over 8 years as a CAD Coordinator. Along with writing his own P&ID package, Greg also has experience with multiple P&ID platforms including Bentley's AutoPLANT, Coade's CADWorx, and P&ID Advantage. He has become a trusted advisor to many in the plant process industry. Greg is also familiar with Autodesk products and has worked with AutoCAD since Release 9.

Greg has also been greatly involved in the CAD community, serving as chairman for the Oklahoma AMUG for 2 years and running the Tulsa AutoCAD User Group (TAUG) for over 10 years. He was honored at Autodesk University last November as AUGI Chapter Member of the Year. Greg also previously served as an instructor for the Tulsa Technology Center teaching their Fundamentals of Process Piping and Design class.

"We are very excited and honored to have Greg on board with D3. His expertise in P&ID will be a welcome addition to our newly added Plant Solutions division at D3. We understand that in order to best serve our customers, we need to have the best talent on our team, Greg is a great example of that," states Kevin Schlack, President of D3.

As D3 moves forward with its Plant Solutions division, customers will continue to see the service and support that they have become accustomed to. D3 will continue to expand their offerings of consulting services and training to customers in the plant and process industry with the Autodesk Plant Solutions, as well as supporting CADWorx customers until they are able to make a full transition to the Autodesk platform.
