D3 TECHNOLOGIES Welcomes Talented New Team Member to Tulsa Office.

Tulsa, Oklahoma - September 14, 2006 - D3 TECHNOLOGIES announces the addition of a talented new team member to their Tulsa, Oklahoma office. Stan Suttles has joined Team D3 as the Regional Sales Manager for the area. Stan's extensive experience in the manufacturing software industry makes him a welcome addition and a huge asset to the team.

Stan has a Bachelor of Science degree in Tele-Communications from Oral Roberts University in Tulsa, as well as over 15 years experience in the CAD software industry. Stan's impressive resume includes being an Owner/Operator of his own manufacturer representation company, Suttles Imaging, where he focused primarily on large format imaging technologies and subsequent migration of scanned legacy data to Autodesk products. As a member of the Tulsa area since 1971, Stan has built many long-term relationships with local manufacturing companies, showing his commitment and desire to represent and support the local manufacturing community.

Commenting on his reasons for joining D3 TECHNOLOGIES, Stan stated, "Over the course of time it had become apparent to me that D3 TECHNOLOGIES has developed into the model Autodesk reseller as it relates to manufacturing and mechanical related products both in the local market and on the national stage as well. So much attention has been brought to bear on their technical service and support capabilities within the regional Autodesk customer base, that when invited to join their team as Regional Sales Manager, it was an obvious and prudent decision for me."

D3's business model has always been focused around the customer and their needs, with Stan's primary concern being for his customers and the services he can offer them, he is in perfect alignment with D3's goal of superior service for their clients. Stan is also joined and supported by a talented team already in place in Tulsa. On staff is Senior Solutions Engineer, Steve Warren, Applications Engineer, John Oehlschlager, and Inside Sales and Customer Service Executive, Lance Gardner. Each team member has strong technical knowledge within the manufacturing industry as well as expertise in Autodesk software solutions.

The office also provides the area with a Premier Autodesk Authorized Training Center, complete with eight training workstations and Autodesk Certified Instructors that train the students in the software, preparing them for implementation of their knowledge in a real-world environment. Not only does D3 have strength in their knowledge of 3D technology, they are well equipped to implement a variety of complimentary services, such as Product Data Management Implementation of Autodesk Vault and Productstream, as well as training and implementation of AutoCAD Mechanical and AutoCAD Electrical software. D3 also offers custom on-site training, as well as evening and weekend classes to work around customers tight production schedules.
