D3 TECHNOLOGIES Announces Partnership with Texas Offline to Support GibbsCAM

Springfield, MO - D3 TECHNOLOGIES, an Autodesk Premier Solutions Provider (PSP) and Autodesk Authorized Training Center (ATC), announces they have joined forces with Texas Offline, selling the premier GibbsCAM for CNC programming. "Gibbs has long been our preferred CAM software to pair with our other products. Our customers are already pleased with the interoperability that GibbsCAM has with Autodesk files," states Kevin Schlack, President of D3 TECHNOLOGIES. With offices in Springfield, MO., Kansas City, MO., Tulsa, OK., and Little Rock, AR., D3 is setting the stage to reach more customers than ever with GibbsCAM. Kevin further comments, "We are delighted that Texas Offline has joined our Gibbs Team to help raise the level of support we bring to our current and future Gibbs customers. With over 10 years experience selling, supporting, and implementing GibbsCAM, they bring to the table the expertise needed to provide our customers with the best CAM tools available".

Texas Offline is the 4th largest GibbsCAM Reseller in the world with offices in both Houston & Dallas, Texas. Jason Heyse, president of Texas Offline agrees, "D3 and Texas Offline both share a passion for top rate products and customer satisfaction. This partnership seems only natural for our two companies." As an authorized GibbsCAM Reseller, Texas Offline is proud to sell the complete GibbsCAM line of 2D, 3D, Advance Turning, 4th & 5th Axis, and MTM. Training for all of these products will be at the D3 offices nearest you. "With the short learning curve of GibbsCAM, you can be programming immediately after a single training session. Our customers prefer GibbsCAM over other CAMs because it was invented by a machinist, for a machinist. Gibbs is Powerfully Simple & Simply Powerful" quips Jason.

Along with the GibbsCAM, Texas Offline also offers their product, Virtual CD Trainer, a training CD used for training on Gibbs or to teach new employees. This can be purchased through D3 or direct at www.virtu-alcdrainer.com

For more information on any of D3 products; Autodesk, GibbsCAM, Virtual CD Trainer, Ansys, or AutoPOL please contact:
