**SPRINGFIELD, MO** – February 11, 2009 – D3 TECHNOLOGIES, the leading provider for Autodesk manufacturing and plant solutions, announces the launch of its new, redesigned website. The new website provides users with easy access to in-depth information about D3 and the services they provide.

“Due to our growth over the years, it was important for us to update our look while giving our customers and prospects a portal for more information about us and what we offer. We’ve reorganized the content of the website to better match our customer needs, and have expanded the availability of helpful tools and resources,” states Chris Whiteid, D3’s Director of Marketing and Business Development.

Some new features of the redesigned website include:

- Current event listings for each location
- Links to latest industry news articles and press releases
- Availability of new technical support downloads and white papers
- Updated training course descriptions and registration forms

“We’ve worked hard to make the new interface much easier for our users to navigate. The new layout is greatly simplified, yet provides our customers and prospects with tools to help make them more efficient. Our goal is always focused around helping our partners become more successful, we hope our new website will be a useful resource for them,” adds Whiteid.

Check out D3’s new website at [www.d3tech.net](http://www.d3tech.net).

### About D3
